

TEXAS DEPARTMENT OF AGRICULTURE

TODD STAPLES
COMMISSIONER

April 9, 2009

The Honorable Kay Bailey Hutchison
U.S. Senate
Russell Senate Office Building
Room 284
Washington, D.C. 20510

Dear Senator Hutchison:

I encourage you to support the request made to United States Department of Homeland Security Under Secretary for Science & Technology Jay Cohen by the Texas Bio and Agro-Defense Consortium (TBAC) for him to re-reconsider the decision to locate the National Bio and Agro-Defense Facility (NBAF) in Manhattan, Kansas, as set forth in the Preferred Alternative Selection Memorandum released to the public on December 5, 2008.

The TBAC team, led by John Kerr and York Duncan, worked diligently to prepare an excellent proposal for San Antonio's application to attract the NBAF. In a letter dated January 8, 2009, Mr. Kerr highlights multiple weaknesses in the selection process and strongly urges Under Secretary Cohen not to adopt the recommendation in the Preferred Alternative Selection Memorandum.

Your interest and encouragement is vital to TBAC's efforts to re-open the site selection process. Bringing the NBAF to Texas provides the opportunity for our state to be a leader in research and technology development. It also presents significant economic development opportunities for San Antonio, our state and the Texas agriculture industry. Locating the National Bio and Agro-Defense Facility in San Antonio will help protect and promote Texas agriculture, and the NBAF would undoubtedly benefit from the knowledge of our industry experts.

Thank you for your service to our state and for your consideration of my request for your support of the Texas Bio and Agro-Defense Consortium's efforts.

Sincerely yours,

Todd Staples

Dear Congressman Johnson:

I encourage you to support the request made to United States Department of Homeland Security Under Secretary for Science & Technology Jay Cohen by the Texas Bio and Agro-Defense Consortium (TBAC) for him to re-reconsider the decision to locate the National Bio and Agro-Defense Facility (NBAF) in Manhattan, Kansas, as set forth in the Preferred Alternative Selection Memorandum released to the public on December 5, 2008.

The TBAC team, led by John Kerr and York Duncan, worked diligently to prepare an excellent proposal for San Antonio's application to attract the NBAF. In a letter dated January 8, 2009, Mr. Kerr highlights multiple weaknesses in the selection process and strongly urges Under Secretary Cohen not to adopt the recommendation in the Preferred Alternative Selection Memorandum.

Your interest and encouragement is vital to TBAC's efforts to re-open the site selection process. Bringing the NBAF to Texas provides the opportunity for our state to be a leader in research and technology development. It also presents significant economic development opportunities for San Antonio, our state and the Texas agriculture industry. Locating the National Bio and Agro-Defense Facility in San Antonio will help protect and promote Texas agriculture, and the NBAF would undoubtedly benefit from the knowledge of our industry experts.

Thank you for your service to our state and for your consideration of my request for your support of the Texas Bio and Agro-Defense Consortium's efforts.

Sincerely yours,

Todd Staples
